SUMMARY

Full Stack Developer with 6 months of internship experience specializing in the Python-Django ecosystem. Proven ability to build, test, and deploy full-stack web applications, with a strong focus on creating efficient backend systems and responsive user interfaces.

EDUCATION & CERTIFICATIONS

Master of Computer Application | University of Kerala

August 2025

Data Analysis with Python Certification

Jun 2025

Machine Learning with Python Certification

Jan 2024

EXPERIENCE

Python Full Stack Developer Intern | Srishti Innovative Technopark

Jan 2025 - Present

- Spearheaded development on two major full-stack projects (AI-powered textile shopping site, Fitloop) using Django and html CSS, from initial design to final deployment.
- Engineered RESTful APIs to handle data flow between the frontend and backend, processing over hundreds of user requests efficiently.
- Refactored UI components using Html and CSS, improving code maintainability and reducing styling code by 30%.
- Integrated NLP and ML modules for chatbot functionality, enhancing user engagement and automating responses to common queries.

PROJECTS

Weavercraft

- Engineered an intelligent textile shopping platform using HTML, CSS, and Django, integrating AI/ML to enhance personalized shopping experiences.
 - Automated fabric recommendations and visual search using machine learning, reducing manual browsing time by an estimated 45%.
- Developed key features including AI chatbot assistance and image-based fabric search, improving overall customer engagement and operational efficiency

Fitloop

- Developed a full-featured tailoring website, *Fitloop*, using Django, enabling users to design and customize dresses online with a seamless, intuitive interface.
- Integrated location-based appointment booking, allowing customers to schedule fittings and consultations with nearby tailors directly through the platform .
- Streamlined the custom order process by providing live style previews and measurements management, enhancing user experience and reducing manual coordination efforts

TECHNICAL SKILLS

Frontend	: HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Responsive Design
Backend	: Django, REST APIs, Machine Learning, NLP
Databases	: SQLite, SQL
Languages	: Python, Java
Tools & Other	: Git, GitHub, API Integration, Debugging
